Exit codes used in the command line

Code	Description	Additional information
0	Success	
1	General error code	
3	Illegal argument duplication	Some arguments may not appear more than once in a command line. If such arguments appear more than once, this exit code will be returned.
8	Unsatisfied argument dependency or violated exclusion when user runs command line	For example, */arg2* depends on */arg1* but you have specified */arg2* without specifying */arg1*. Alternatively, */arg2* cannot be used with */arg1* but you have tried to use them both.
32	Value out of range	Numeric value supplied for an argument that is outside the range of valid values for that argument.
33	Value overflow	The magnitude of a value supplied for an argument is too large and causes an overflow.
34	Invalid value	The value supplied for an argument is invalid.
35	No / invalid software license or trial period has expired	
63	Error	
64	General command-line usage error	
65	Data error	Some input data required by the tool is invalid or corrupt.
69	A resource or service required to run the tool is unavailable	
70	Internal software error	This code is returned when SQL Doc fails with an unknown exception. If SQL Doc returns this exit code, contact support. ✅ If you submit a support request, it's useful for us if you attach a log file.
73	Failed to create report	
74	IO error occurred	This code is usually returned if the program attempts to write to a file that already exists without the user having specified the */force* option.
77	Action cannot be completed because the user does not have permission	
126	Execution failed because of an error	
130	Execution stopped because Ctrl+Break	
400	The command line arguments cannot be properly executed	
402	There is no acceptable license	For information about finding your serial number and activating your license, see Licensing.
499	Activation was cancelled because the Cancel button was pressed during the process	
500	An unhandled exception occurred	The exception's message and stack trace will be included. If the error persists, contact support.
