Version 8.0.0.1241 - May 11th, 2017

Features

- Improved Formatting options ([UserVoice](#))

The formatting styles are now much more customizable. We've added many new options based on your feedback. Some of the new features include:

- Add options for CASE WHEN ELSE END ([UserVoice](#))
- Disable SQL Prompt on certain blocks of code ([UserVoice](#))
- Quick switching between styles ([UserVoice](#))
- Indent comments consistent with code ([UserVoice](#))
- Support a common indenting option for SELECT ([UserVoice](#))
- Expose all formatting options in the UI ([UserVoice](#))
- Format common table expressions (CTEs) ([UserVoice](#))
- Simple, but toggle indenting of else if statements ([UserVoice](#))
- Column aliases alignment ([UserVoice](#))
- Moving commas from "end" to "start" is always buggy when comments exist ([UserVoice](#))
- Remove extra space between statements option is needed ([UserVoice](#))
- Line up type declarations ([UserVoice](#))
- Place semicolon on new line ([UserVoice](#))
- Option to place Table names on the same line as the keyword ([UserVoice](#))
- Do not indent FROM and WHERE clauses ([UserVoice](#))
- Merge command formatting options ([UserVoice](#))

[Learn more about formatting your code with SQL Prompt 8](#)

- Support for SSMS 2017 and Visual Studio 2017.

Please note that this release no longer supports SSMS 2008 R2 or earlier versions.
