

SQL Change Automation 3.2 release notes

3.2.19168 - June 18th, 2019

Improvements

- Updated SQL Compare Engine to 13.7.17.11340

3.2.19162 - June 11th, 2019

Fixes

- SCA-2615 : The multisubnet_failover option is set when running sqlcmd against database connections that have MultiSubnetFailover set to true
- The import command will not overwrite settings with out of date values

Improvements

- SCA-2579: Added checks for scenarios where the development and shadow database connections are not available and improved the error messages for those scenarios
- Updated SQL Compare Engine to 13.7.16.11276

3.2.19151 - June 3rd, 2019

Fixes

- SCA-2610: Fixed issues with default database in connection dialog causing InitialCatalog to be removed from connection strings
- SCA-1836: Fixed revert of non-transactional objects

Improvements

- Updated SQL Compare Engine to 13.7.14.11100
- Added logging for skipped migrations and programmable objects when running the package deployment script

3.2.19141 - May 21st, 2019

Improvements

- Updated SQL Compare Engine to 13.7.14.10948

3.2.19135.7645 - May 15th, 2019

General

- SQL Change Automation now requires .NET Framework 4.7.2

Improvements

- Updated SQL Compare Engine to 13.7.14.10830
