

SQL Change Automation 3.3 release notes

3.3.19233 - August 21st, 2019

Improvements

- Updated SQL Compare and SQL Data Compare to 13.8.0.12547

Fixes

- Fix an error that could occur when starting without a project loaded with an unactivated license in Visual studio 2019

3.3.19225 - August 13th, 2019

Improvements

- Updated SQL Compare Engine to 13.7.23.12372

Fixes

- SCA-2361: Programmable objects with conditions defined now correctly execute based on the condition when using package scripts.
- The `dbName` variable is now included in the package script header

3.3.19211 - July 30th, 2019

Features

- SCA-2626: Programmable object files will now be deleted from disk when their associated objects are removed from the project via an import
- SCA-2616: Offline Schema Model files will now be deleted from disk when their associated objects are removed from the project via an import
- SCA-2627: It is now possible to execute a patch script against a different database from that used to generate it

Improvements

- Updates SQL Compare and SQL Data Compare to 13.7.21.12187

Fixes

- SCA-2578: Fixed an issue with changing projects after viewing object differences.
- SCA-2629: Error no longer printed to log file when performing shadow deployment with programmable objects with custom transaction handling

3.3.19204 - July 23rd, 2019

Features

- SCA-2625: You can now specify the `EvaluateExecutionOrderOnImport` option to always update the programmable object deployment order when generating migrations

3.3.19197 - July 16th, 2019

Improvements

- Updated SQL Compare Engine to 13.7.18.11947

3.3.19190 - July 9th, 2019

Improvements

- Updated SQL Compare Engine to 13.7.18.11782

3.3.19183 - July 2nd, 2019

Fixes

- SCA-2619: Don't select equal Compare differences during comparison

Improvements

- Updated SQL Compare Engine to 13.7.17.11648

3.3.19177 - June 26th, 2019

Improvements

- Updated SQL Compare Engine to 13.7.17.11489
