

SQL Change Automation PowerShell 3.3 release notes

3.3.19233 - August 21, 2019

Improvements

- Updated SQL Compare and SQL Data Compare to 13.8.0.12547

Fixes:

- SCA-2634: Fixed issue with SQL Change Automation project release artifacts where pre-update schema check might fail with static data in a system versioned table
- SCA-2636: Fixed issue where SQLCompare NoTransactions option would not be fully honoured if static data was enabled

3.3.19225 - August 13, 2019

Improvements

- Updated SQL Compare Engine to 13.7.23.12372

3.3.19217 - August 5, 2019

Fixes:

- SCA-2623: The IncludeTimestamps data compare option is now switched off by default

3.3.19212 - July 31, 2019

Features:

- SCA-2627: It is now possible to execute a SQL Change Automation project release artifact against a different database from that used to generate it
- Updates SQL Compare and SQL Data Compare to 13.7.21.12187

Fixes:

- SCA-2629: Error no longer printed to log file when performing shadow deployment with programmable objects with custom transaction handling

3.3.19197 - July 25, 2019

Features:

- Updates SQL Compare and SQL Data Compare to 13.7.20.12082

3.3.19197 - July 16, 2019

Features:

- Updates SQL Compare and SQL Data Compare to 13.7.18.11947

3.3.19190 - July 9, 2019

Features:

- Updates SQL Compare and SQL Data Compare to 13.7.18.11782

3.3.19185 - July 4, 2019

Fixes:

- Logs now show the number of objects causing the skip when skipping baseline on deploy.
- Version numbers now appear correctly when using the installer.

3.3.19183 - July 2, 2019

Features:

- Updates SQL Compare and SQL Data Compare to 13.7.17.11648

3.3.19177 - June 26, 2019

Features:

When deploying SQL Source Control projects you can now configure static data options in the following cmdlets:

- Invoke-DatabaseBuild
- New-DatabaseDocumentation
- Invoke-DatabaseTests
- New-DatabaseReleaseArtifact
- Sync-DatabaseSchema

See [Using comparison options with SQL Change Automation PowerShell module for SQL Source Control Projects](#) for details

Changes:

Changed the contents of the result returned by the New-DatabaseReleaseArtifact cmdlet when run against a SQLSourceControl project
