

Troubleshooting

These pages describe how to fix common problems with SQL Source Control.

- [Unable to push changes to remote git repository](#)
- [Logging and log files](#)
- [Linking fails due to SVN pre-commit hooks](#)
- [Mark migration script as undeployed](#)
- [Object changed by Unknown](#)
- [Error messages](#)
- [Refresh in commit and get latest tabs takes a long time](#)

If your problem isn't covered here, try the [SQL Source Control forum](#) or [contact Redgate support](#).
