

# SQL Backup Pro 7.7 release notes

July 8th, 2014

This is a minor release of SQL Backup Pro and includes the following enhancements and bug fixes:

## New features

- Support for backing up and restoring SQL Server 2014 databases
- SQL Backup UI and the SQBHostedStorageClient.exe now run on .NET 4 only platforms

## Bug fixes

- The Activity History no longer scrolls to the top of the list when the auto-refresh is triggered

This release also include three previously released patches:

- Fixed an issue in SQBHostedStorageClient.exe where it was occasionally possible for a backup to become corrupted during upload to hosted storage
- Fixed a crash in the SQB Convertor UI when converting SQB files to native SQL backups
- Fixed spurious 976 error message when backing up an AlwaysOn secondary
