

Settings and options

You can define file management options, email settings and hosted storage settings for each SQL Server that you have added to the SQL Backup Pro graphical user interface (GUI). From the **Tools** menu select **Server Options**, then select the SQL Server from the drop-down list. For more information see:

- [File management options](#)
- [Email settings](#)
- [Hosted storage settings](#)

The following settings and options are not specific to each SQL Server and are not available in the **Server Options** dialog:

- [Activity cache location](#)
- [File location tags](#)
- [Compression levels](#)
