

Log locations

SQL Clone generally logs to the Windows Event Viewer. In addition, there are usually log files available.

SQL Clone Server

Installer: Click the icon in the top left corner of the installer when an error occurs and choose "Log file" to locate the log file in order to share it with us.

Service: Find the local app data folder for the user the the service runs as (e.g. *C:\Users\your.service.account\AppData\Local*). Within that folder, logs are under *Red Gate\Logs\SQL Clone*

SQL Clone Agent

Installer: If installation of the SQL Clone Agent fails, the installer will offer to open the logs. You can also check *%LOCALAPPDATA%\Red Gate\Logs\SQL Clone\Installer* for the agent installer logs in the event of failure.

Service: Find the local app data folder for the user the the service runs as (e.g. *C:\Users\your.service.account\AppData\Local*). Within *Red Gate\Logs\SQL Clone*, find *Agent w.x.y.z* where w.x.y.z is the installed agent version.
